PROFESSIONAL SUMMARY

Frontend and Web Developer focused on creating responsive, interactive, and user-friendly web experiences. Hands-on project work includes a React-based personal portfolio with motion-based UI elements, a food website built with HTML, CSS, and JavaScript, and Sapience AI / NoteWise, a knowledge-assistant concept designed to turn information-heavy AI responses into concise, point-to-point bullet summaries. Technical toolkit includes React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Node.js, Express.js, Python, Flask, MySQL, SQL, Git, GitHub, Vite, and Vercel. Interested in frontend and web development roles or internships where I can contribute to UI development, responsive design, and practical product features.

TECHNICAL SKILLS

Frontend Development: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design, UI Development, Component-Based Architecture

UI / Web Concepts: Interactive UI, Motion-Based UI, Layout Design, Flexbox, CSS Grid, Navigation, Usability, Cross-Screen Responsive Layouts

Backend Development: Node.js, Express.js, Python, Flask, REST API Concepts, Frontend–Backend Integration

Databases: MySQL, SQL, Relational Data Modeling, Database Schema Design

Tools & Deployment: Git, GitHub, VS Code, Vite, Vercel

PROJECTS

SAPIENCE AI / NOTEWISE — Concise AI Knowledge Assistant | GitHub Repository

Tech Stack: React.js, Node.js, Express.js, MySQL

- Designed around a common challenge with AI tools: long, information-heavy responses can make it difficult for users to identify the most relevant points quickly.
- Built the project concept to present information in concise, point-to-point bullet summaries, helping users scan key details and focus on the most useful content.
- Included a copy-friendly workflow so users can reuse generated content in their notes and study materials.
- Implemented a Microsoft OneNote saving workflow that lets users transfer selected summaries directly into their notes.
- Worked on the React.js interface and application pages, with MySQL data models for users, conversations, and messages as part of the full-stack project.

PERSONAL PORTFOLIO WEBSITE | GitHub Repository

Tech Stack: React.js, JavaScript (ES6+), Tailwind CSS, Vite, Vercel

- Developed a React-based portfolio to present projects, technical skills, education, and contact information in a single, organized experience.
- Built interactive, motion-based UI elements and structured reusable page sections to create a more engaging browsing experience.
- Organized navigation and responsive layouts so visitors can explore the portfolio across different screen sizes.
- Published the portfolio using Vercel.

BURGER-X — Food / Burger Website | GitHub Repository

Tech Stack: HTML5, CSS3, JavaScript

- Created a food website as a hands-on practice project, focusing on a clear product presentation and a restaurant-style web experience.
- Developed page layouts using HTML, CSS, Flexbox, and CSS Grid, with responsive styling for different screen sizes.
- Applied JavaScript and frontend styling to make the interface more engaging and improve usability.

SOFT SKILLS

Problem-Solving • Logical Thinking • Communication Skills • Teamwork & Collaboration • Adaptability • Self-Motivation • Attention to Detail • Leadership

EDUCATION

Bachelor of Computer Applications (BCA) — Dr. Virendra Swarup Institute of Computer Studies, Kanpur

2024–2027 | CGPA: 8.62/10

CERTIFICATIONS

AWS Solutions Architect Certificate — Forage | 2026

React.js & JavaScript — HackerRank (2026) | SQL — HackerRank (2026) | Python Programming — CodeWithHarry (2026)
